BLUJAY CLIPPERSHIP®
INTEGRATED SYSTEMS ASSOCIATES, INC.

Clippership is the most widely deployed parcel shipping solution on the market today and enables users to achieve new levels of shipping automation, easily, efficiently, and cost-effectively.

CLIPPERSHIP TURNS ANY USER INTO A SHIPPING PRO!

Clippership is a powerful, Windows-based shipping application that offers solutions to complex shipment processing routines with ease and flexibility.

Automate shipment processing for all your outbound carriers including; UPS, UPS SurePost, UPS Mail Innovations, FedEx Express, FedEx Ground, FedEx SmartPost, USPS, Endicia, Stamps.com, DHL, DHL Global Mail, Eastern Connection, LTL / TL, & practically any user defined service.

Clippership's intuitive UI enables virtually any user to rate-shop multiple carriers, print shipping labels, transmit EDI information and print reports with minimal training.

## KEWILL.INTEGRATE (KI) TURBO CHARGES CLIPPERSHIP

KI is based on Microsoft Visual Basic and can integrate Clippership with virtually any back office, order management or WMS. This flexible integration tool enables users to streamline the fulfillment process, eliminate re-keying errors and provide complete shipment visibility.

All ISA engineers are certified Kewill technicians and are well versed in KI's powerful features. KI has been used to create custom windows, databases, labels and much more. The possibilities are endless!

ISA has been deploying Clippership systems since the pre-Windows era. Our sales & support team has a wealth of knowledge that can help tailor fit a shipping solution just for you.

ISA has developed comprehensive interfaces between Clippership and order processing and/or warehouse applications.

- Multi-Carrier Compliant
- Electronic Manifesting
- Compliance Label Printing
- Rate Shopping
- Turnkey Solution
- Extensive Reports
- Custom Printing Solutions
- Scalable
- Easy to Maintain

ISA DEVELOPED ADD-ONS

ISA has developed comprehensive interfaces between Clippership and order processing and/or warehouse applications. Integrations range from the typical manifest station to Pick/Pack systems with full carton Bulk Processing components.

We've worked closely with end users to create compliant ASN components, such as custom labeling, reporting and EDI transmissions.

Our **TruckDocs®** software has been used to automate Truck shipments through Clippership. Create VICS & Straight Bills of Lading, rate-shop freight carriers, create PRO Numbers, electronic BOL's and much more.

Our **IN-KCS Mail™** product provides hooks to internet PC Postage vendors and prints compliant USPS shipping labels & customs documents. As an added benefit, addresses are validated by CASS™ Certified – Residential aware servers at no additional charge!
