

MULTI-CARRIER AUTOMATED BATCH TRACKING

INTEGRATED SYSTEMS ASSOCIATES, INC.

# ShipInquest™

Gain instant access to tracking results for Clippership® (aka BluJay Parcel) shipments, regardless of when it was shipped!

## How it works

ShipInquest will review every **Clippership** package you've shipped, track all applicable packages using the carrier's web API, and then store tracking results directly into your Clippership archive files. No user interaction is required.

## Permanent storage

The carriers will eventually delete your tracking information, but with ShipInquest, all your tracking details will be permanently stored safely within your Clippership archive files for whenever you need them.

## What about old shipments?

We've got you covered! ShipInquest will track all your packages as far back as the carriers will allow.

## User Mode

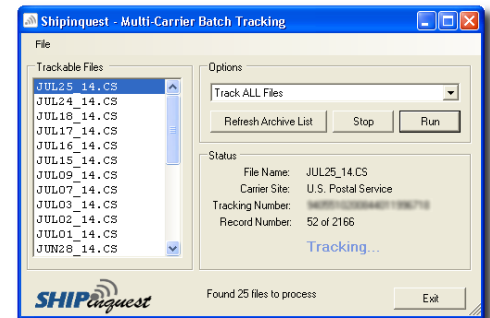

Track any Clippership archive as needed on-demand.

## Silent Mode

Schedule unattended batch tracking during network off-peak hours.

## WinServ™ Compatibility

As part of our enhanced suite of utilities, **WinServ** enables users to search through Clippership archive files, and then export ShipInquest tracking details to comma delimited (CSV) and Microsoft Excel (XLS) files.

Arm your team with the tools required to effectively support the ever changing world of shipping.

Integrated Systems offers a suite of utilities that enable shippers and support individuals to pre-ship items, validate domestic addresses, ship virtually any carrier, create custom Bills of Lading, search through historical data, and much more. Call today to speak with our haste free sales staff or in-house team of engineers.

# WinServ™

by Integrated Systems Associates, Inc.

This powerful database search engine is optimized for Clippership® users and enables them to scan historical shipping data and return relevant results at a moment's notice.

Create custom search views to display only the information your staff needs. And as a bonus feature, WinServ allows users to export search results and import results into their favorite database viewer.

## TRACKING RESULTS

When combined with ShipInquest™, your support team can easily locate shipments, view tracking results and quickly convey details to awaiting recipients.

For those users without ShipInquest, WinServ offers its own built in web browser with real-time tracking capabilities to confirm package statuses at a moment's notice.

WinServ is developed by:
